**Application No.:** 

09/911,620

a breast prosthesis having a front surface and a rear surface, said rear surface being positionable adjacent to a wearer's body;

<u>front</u> hook material positioned on said front surface; [and] <u>rear hook material positioned on said rear surface;</u>

a bust cup including loop material engagable with said hook material, wherein said breast prosthesis is receivable in said bust cup; and

a comfort pad attached to said rear surface through said rear hook material.

Please cancel claims 6 and 9 without prejudice.

Please amend claim 7 as follows:

7. (Amended) The breast prosthesis and bust cup system of claim [6] 1 wherein said rear hook material comprises two strips of hook material positioned along a periphery of the breast prosthesis.

Please amend claim 10 as follows:

10. (Amended) A breast prosthesis adapted for use by a wearer comprising:

a front surface and a rear surface, said rear surface being [positionably] positionable adjacent to a wearer's body;

hook material positioned on said front surface;

rear hook material positioned on said rear surface; and

Application No.:

09/911,620

a comfort pad removably attached to said rear surface through said rear hook material.

Please add new claims 15 through 22 as follows:

- 15. The breast prosthesis and bust cup system of claim 1, wherein said rear surface of said breast prosthesis has a substantially triangular shape with rounded corners.
- 16. The breast prosthesis and bust cup system of claim 10, wherein said rear surface has a substantially triangular shape with rounded corners.
- 17. The breast prosthesis and bust cup system of claim 1, wherein said comfort pad has a substantially triangular shape with rounded corners.
- 18. The breast prosthesis and bust cup system of claim 10, wherein said comfort pad has a substantially triangular shape with rounded corners.
- 19. A breast prosthesis adapted for use by a wearer comprising:

a prosthesis having front surface and a rear surface, said rear surface being positionable adjacent to a wearer's body and having a first shape;

a comfort pad having a second shape generally congruent to said first shape; and

**Application No.:** 

09/911,620

hook and loop means for removably attaching said comfort pad to said rear surface.

- 20. The breast prosthesis of claim 15 wherein said hook and loop means comprise two strips of hook material positioned along a periphery of the breast prosthesis.
- 21. The breast prosthesis of claim 20 wherein each of said strips has a length greater than its width.
- 22. The breast prosthesis of claim 19, wherein said first and second shapes are generally triangular with rounded corners.

## A COPY OF THE AMENDED AND ADDED CLAIMS IS ENCLOSED HEREWITH.

## **REMARKS**

Applicant has amended independent claim 1 to more precisely define the invention. Claims 6 and 9 have accordingly been canceled without prejudice. The dependency of claim 7 has been amended to ensure proper dependency. Claim 10 has been amended to correct a clerical error. Applicant has added new claims 15-22 to provide additional coverage for Applicant's invention.
